

Create new business, grow your network and get up-to-date on the latest opportunities & developments at TUS Nordics!

The Unmanned Systems market is booming! Would you like to come into contact with new customers, suppliers and business partners? Do you want to present your new product or service to a global audience, and share knowledge with others at a dedicated UAS conference?

Make [TUS Nordics](#) part of your sales & marketing strategy!

TUS Nordics is a **fully integrated** international Unmanned Systems trade show and conference, attracting a wide range of industry stakeholders from across the entire industry, with a particular focus on the Scandinavia region.

You will find unique new business opportunities in the Nordic countries in the niches:

- > Offshore
- > Energy
- > Agriculture & Forestry
- > Arctic Research
- > Unmanned Cargo & Delivery
- > Search & Rescue
- > Maritime Research/Applications
- > Construction & Property
- > Security & Safety

At TUS Nordics, we understand the investments your company makes to participate in a trade show: securing exhibition space; developing an eye-catching exhibit; training staff members to run the exhibit; arranging travel details; and so on. We strive to ensure your success at TUS Nordics by providing you with the necessary tools and quality assistance at all times – before, during and after the event.

Are you ready to get involved?

For more information about participation, contact our Sales Team today!

After four years of organizing the Nordic UAS Event, the city of Odense and TUS Expo joined forces to organize this international unmanned systems event, under the name TUS Nordics ([press release](#)).

[The TUS Nordics website is live now!](#)

The city of Odense is a recognized hub for Unmanned Systems in Scandinavia. It is the epicenter for all Nordic UAS business, gathering end-users and industry specialists from the Nordic countries and around the world. For **industry, academia, and government** it is considered as the premier location to go for education, research, innovation, collaboration, and technology transfer, both in Denmark, Scandinavia and the entire European continent. Odense's local airport, **Hans Christian Andersen Airport**, hosts Denmark's national BVLOS test center for drones, the **UAS Test Center**, contributing even more to the vast resources and support available for unmanned systems in the region.

GeoConnexion International is the leading business-to-business monthly for users of spatial professionals across the globe. It covers applications of GIS, GPS and remote sensing within industry sectors, such as telecoms, emergency services, public safety, government, utilities and retailing.
